

# **Background Music Workshops for Schools**

There are 3 perspectives on the use of background music in schools which I consult in. I would highly recommend a day in which these are covered, but the breakdown is as follows:

## **1. School Administrators**

Allow me to make you a presentation on the benefits of providing a background music system throughout the school environment during non-teaching times. I can share my experiences, the pitfalls as well as the nuts and bolts issues.

## **2. School Teaching Staff**

Does the use of background music within the classroom enhance or distract students? When should I use it, and what type of music should I use? Then there is the question of student use of mp3 players...

## **3. Students**

My 45 minute presentation to your students will enhance their understanding in the nature of study, stress and music listening. Given that the majority of students in our schools study with music or television, this is a must.
